

Year One Home Learning Project - Plants and Me

Choose one of these activities to complete at home with your family.

Knowledge

Draw a picture of yourself surrounded by things that interest you e.g. sports, toys or foods you like.

Research

Choose a plant to research. It could be a plant in your home, garden or a park near you. It could even be an unusual plant that grows in another country! Draw it and write or tell someone about its colour, shape, and what it needs to grow (like sunlight and water).

Create

Make a collage of your favourite plant. You could use found materials from around your house if you would like.

Home learning projects to be completed by 16th October. Please bring your projects in to school for us to share in class.
